## Driving Excellence

### SDK Service Vehicle Fleet

Since its inception over 25 years ago, SDK Environmental Limited has been one of the UK's leading providers of pest control and animal warden services.

With its head office in Berkshire, SDK provides services to a wide range of corporate clients throughout the Midlands and Southern England.

All our systems and procedures are drawn from industry best practice; we have witnessed, tailored and improved our services to meet operational and customer needs. We continue to invest intellectually and financially in new technology and implement any innovations we identify that will deliver proven benefits to our performance or customer service.

#### Home Counties & London Office:

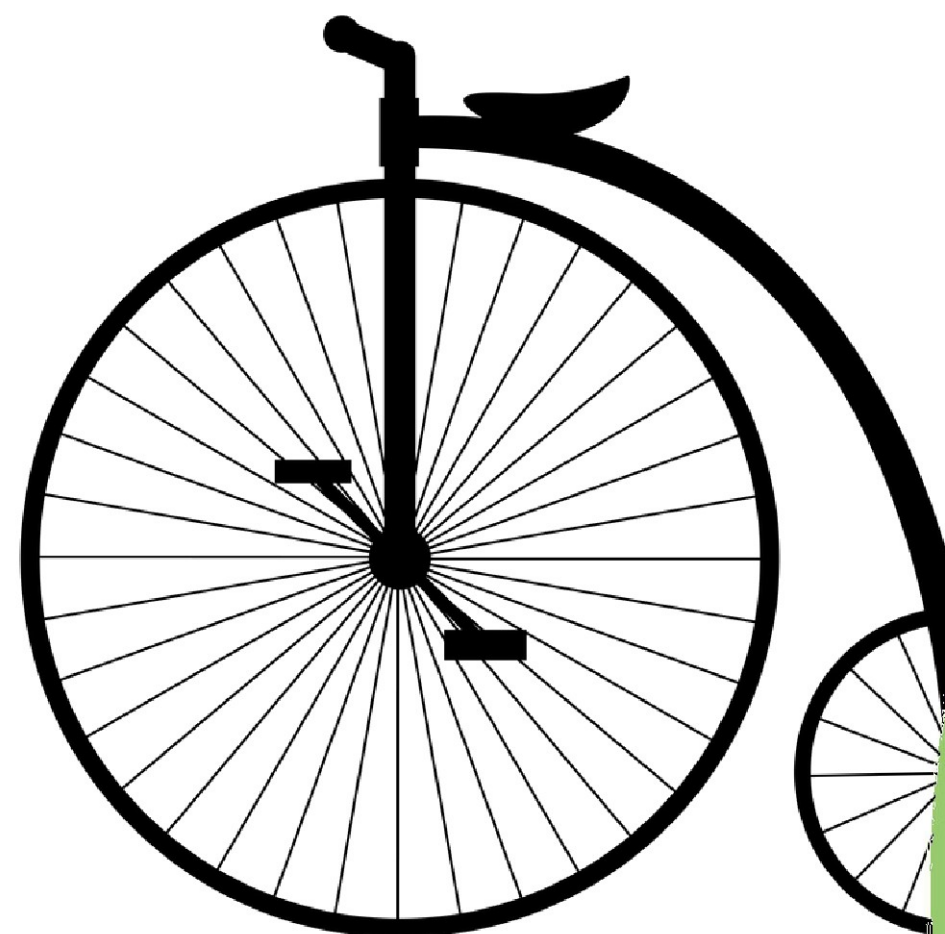

Unit 9, The Business Village, Wexham Road, Slough, SL2 5HF

- PDA e-mail and internet enabled

# DRIVING

## VEHICLE CONSTRUCTION AND DESIGN

SDK Environmental operates a fleet of over fifty modern, light commercial vehicles. The availability on reliability of these vehicles is critical to the successful delivery of our services to clients and customers.

In partnership with our specialist coach builders, we have developed a series of vehicle designs for each of the services we provide. These are based on the cumulative knowledge and experience gained over many years and we continually seek to improve these as new vehicles are launched and our service provisions expand.

Prior to deployment, the vehicles are adapted to meet the predefined specifications that cater for hygiene, security, safety and operator-convenience requirements.

## SELECTING THE RIGHT VEHICLE FOR THE JOB AND THE ENVIRONMENT

A detailed risk assessment is made when ordering new vehicles and this is based on the demographic area for deployment and the services to be delivered.

This assists with deciding which vehicle model, size, adaptations and engine fuel type is selected to enable us to meet client requirements and minimise our environmental impact.

We currently operate

- Lean Burn Petrol
- Dual Fuel LPG / Petrol
- Diesel Fuel (Euro 5 complaint diesels check)
- Diesel Electric Hybrids

Our commitment to the environment includes the introduction of diesel-electric hybrid vehicles as company car to SDK management.

Our satellite tracking and CRM systems provide accurate information bases for carbon usage reporting which can be supplied to council clients as part of our on-demand report services.

# EXCELLENCE

## TWIN SERVICE VEHICLES

We have been offering joint dog and pest service options for over ten years and have observed increasing interest from council clients this option.

As a result of the increased demand for the delivery of both services, SDK has significantly increased the number of vehicles purchased the ability to provide both services from one vehicle.

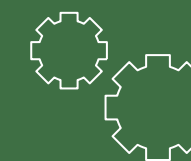

The ability to design and deploy vehicles capable of providing these twin services is one of SDK's key advantages in the marketplace and enables service extensions to be integrated into any of our existing contracts in a seamless, cost effective manner.

## VEHICLES ADAPTATIONS
